Service Back Co	vei

Thank you for buying a KENNORE appliance.

Your KENMORE gas range takes on a new value when you discover that Sears has service centers around the country. Trained Sears Service Professionals use fully-equipped trucks and Searsapproved methods for expert repairs backing up all Sears guarantees.

Pisasa record your model's iofonnation.

Whenever you call to request service for your appliance, you need to know your complete model number and serial number. You can find this information on the model and serial number plate (see diagram in the "Parts and Features," p. 6).

Please also record the purchase date of your appliance and your store's name and telephone number.

Model Number	665.
Serial Number_	R
Purchase Date	

Keep this book and the sales slip together in a safe place for future reference.

Free-Standing Range Warranty

FULL ONE YEAR WARRANTY ON ALL PARTS

If, within one year from the date of installation, any part fails to function properly due to a defect in material or workmanship. Sears will repair or replace it, at our option, free of charge.

If this product is subjected to other than private family use, the above warranty is effective for only 90 days.

WARRANTY SERVICE IS AVAILABLE BY CONTACTING THE NEAREST SEARS SERVICE CENTER IN THE UNITED STATES.

This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

Sears Roebuck and Co. Dept. 817WA Hoffman Estates, IL 60179

To Further Add To The Value Of Your Range, Buy a Sears Maintenance Agreement.

Years of Ownership Coverage	1st Year	2nd Year	3rdYear
1. Replacement of Defective Parts	W	MA	MA
Annual Preventive Maintenance Check at Your Request	MA	MA	MA

W = Warranty

MA = Maintenance Agreement

Your Kenmore appliance is designed, manufactured and tested to provide years of dependable operation. Yet any major appliance may require service from time to time. The Sears Maintenance Agreement offers you an outstanding service program, affordably priced.

The table above shows the additional benefits a Sears Maintenance Agreement provides beyond the Sears Warranty. Contact your Sears Sales Associate or call 1-800-827-6655 to purchase a Sears Maintenance Agreement.

WARNING: If the information in this manual is not followed exactly, a fire or explosion may result causing property damage, personal injury or death.

- Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.
- WHAT TO DO IF YOU SMELL GAS
 - Do not try to light any appliance.
 - Do not touch any electrical switch.
 - Do not use any phone in your building.
 - Immediately call your gas supplier from a neighbor's phone. Follow the gas supplier's instructions.
 - If you cannot reach your gas supplier, call the fire department.
- Installation and service must be performed by a qualified installer, service agency or the gas supplier.

Range Safety

Your safety and the safety of others are very important.

We have provided many important safety messages in this manual and on your appliance. Always read and obey all safety messages.

This is the safety alert symbol.

This symbol alerts you to potential hazards that can kill or hurt you and others.

All safety messages will follow the safety alert symbol and either the word "DANGER" or "WARNING." These words mean:

ADANGER

You can be killed or seriously injured if you don't immediately follow instructions.

AWARNING

You can be killed or seriously injured if you don't follow instructions.

All safety messages will tell you what the potential hazard is, tell you how to reduce the chance of injury, and tell you what can happen if the instructions are not followed.

THE ANTI-TIP BRACKET

The range will not tip during normal use. However, the range can tip if you apply too much force or weight to the open door without the anti-tip bracket fastened down properly.

AWARNING

Tip Over Hazard

A child or adult can tip the range and be killed.

Connect anti-tip bracket to rear range foot.

Reconnect the anti-tip bracket, if the range is moved.

See the installation instructions for details.

Failure to follow these instructions can result in death or serious burns to children and adults.

Anti-Tip Bracket

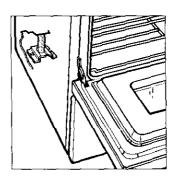

Making sure the anti-tip bracket is installed:

- Slide range forward.
- Look for the anti-tip bracket securely attached to floor.
- Slide range back so rear range foot is under anti-tip bracket.

Range Foot

Anti-tip bracket location

The illustration on the right shows the proper placement of the anti-tip floor bracket. To install correctly, see your installation instructions.

IMPORTANT SAFETY INSTRUCTIONS

WARNING: To reduce the risk of fire, electrical shock, injury to persons, or damage when using the range, follow basic precautions, including the following:

- WARNING: To reduce the risk of tipping of the range, the range must be secured by properly installed anti-tip devices. To check if the devices are installed properly, slide range forward, look for anti-tip bracket securely attached to floor, and slide range back so rear range foot is under anti-tip bracket.
- CAUTION: Do not store items of interest to children in cabinets above a range or on the backguard of a range – children climbing on the range to reach items could be seriously injured.
- Proper Installation The range, when installed, must be electrically grounded in accordance with local codes or, in the absence of local codes, with the National Electrical Code, ANSI/NFPA 70. In Canada, the range must be electrically grounded in accordance with Canadian Electrical Code. Be sure the range is properly installed and grounded by a qualified technician.
- This range is equipped with a three-prong grounding plug for your protection against shock hazard and should be plugged directly into a properly grounded receptacle. Do not cut or remove the grounding prong from this plug.

- Disconnect the electrical supply before servicing the appliance.
- Never Use the Range for Warming or Heating the Room.
- Injuries may result from the misuse of appliance doors or drawers such as stepping, leaning, or sitting on the doors or drawers.
- Maintenance Keep range area clear and free from combustible materials, gasoline, and other flammable vapors and liquids.
- Storage in or on the Range Flammable materials should not be stored in an oven or near surface units.
- Top burner flame size should be adjusted so it does not extend beyond the edge of the cooking utensil.

For self-cleaning ranges -

 Before Self-Cleaning the Oven – Remove broiler pan and other utensils. Wipe off all excessive spillage before initiating the cleaning cycle.

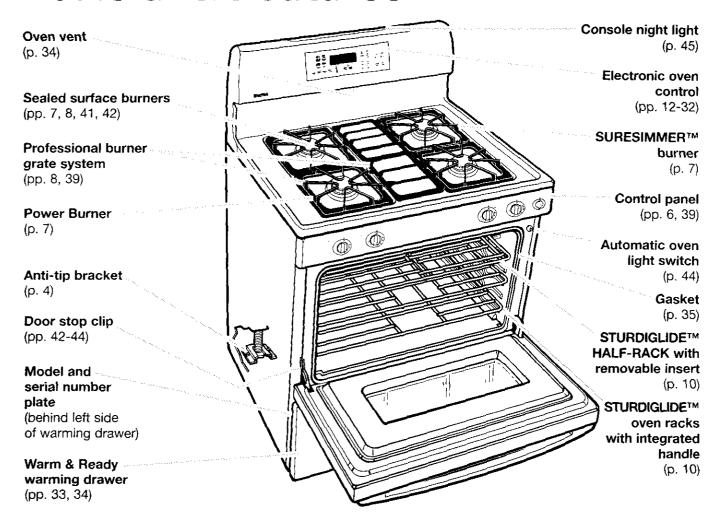

SAVE THESE INSTRUCTIONS

The California Safe Drinking Water and Toxic Enforcement Act requires the Governor of California to publish a list of substances known to the State of California to cause cancer, birth defects, or other reproductive harm, and requires businesses to warn of potential exposure to such substances.

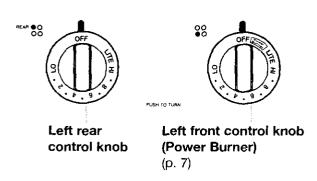

WARNING: This product contains a chemical known to the State of California to cause cancer, birth defects, or other reproductive harm.

This appliance can cause low-level exposure to some of the substances listed, including benzene, formaldehyde, carbon monoxide, toluene, and soot.

Using Your Range

USING THE SURFACE BURNERS

AWARNING

Fire Hazard

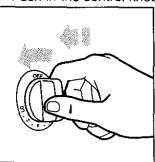

Do not let the burner flame extend beyond the edge of the pan.

Turn off all controls when not cooking. Failure to follow these instructions can result in death or fire.

Using the control knobs

Your range comes with electric ignitors that light the burners each time you turn the control knobs to LITE.

- Place a filled pan on the burner grate before turning on the surface burner. Do not operate a burner for extended periods of time without having cookware on the grate.
- Push in the control knob and turn it counter-

clockwise to the LITE position. The clicking sound is the ignitor sparking. Make sure the burner has lit.

• Stop the clicking sound after the burner lights by turning the control knob anywhere between HI and LO.

NOTES:

- Do not try to lite the surface burners during a power failure.
- All four electric ignitors will click at the same time. However, the burner with the control knob turned to LITE is the one that will ignite.

REMEMBER: When range is in use or during the Self-Cleaning cycle, the entire cooktop area may become hot.

Burner heat settings

Use the following chart as a guide.

SETTING	RECOMMENDED USE	
LITE	 To light the burner. 	
Power Burner (left front burner)	 To provide highest heat setting. 	
HI	To start food cooking.To bring liquid to a boil.	
Mid-range (between HI and LO)	 To hold a boil. To fry chicken or pancakes To cook gravy, pudding, or icing. To cook large amounts of vegetables. 	
LO	To keep food warm.To simmer.	
SURESIMMER™ setting (right rear burner)	 To provide lowest simmer/heat setting. To melt chocolate or butter 	

NOTE: Do not leave empty cookware, or cookware which has boiled dry, on a hot surface burner. The cookware could overheat, causing damage to the cookware or cooking product.

Using Power Burner

The left front burner is designed to give ultra-high power when it is fully on. It can be used to rapidly bring liquid to a boil and to cook large quantities of food.

Using SURESIMMER

The right rear SURESIMMER burner is designed for low temperature cooking. It allows accurate simmer control at the lowest setting.

Easy w**ays to s**ave energy

- To help shorten your cooking time, use the least amount of liquid possible.
- Start your food on a higher heat setting, then turn the control to a lower setting to finish cooking.

USING THE SURFACE BURNERS (contd.)

Home canning information

The large diameter of most water-bath or pressure canners combined with high heat settings for long periods of time can cause damage to the cooktop.

To protect your range:

- Center the canner over the surface burner. Do not extend more than 1 inch outside the burner area.
- Do not place your canner on two surface burners at the same time.
- Start with hot water, cover with a lid and bring to a boil; then reduce heat to maintain a boil or required pressure levels in a pressure canner.
- Refer to your canner manual for specific instructions.

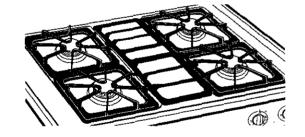

For up-to-date information on canning, contact your local U.S. Government Agricultural Department Extension Office or companies who manufacture home canning products.

Using the right cookware makes a big difference

- The pan should have a flat bottom, straight sides, and a well-fitting lid.
- Choose medium to heavy gauge (thickness) cookware.
- The pan material (metal or glass) affects how quickly and evenly the pan heats.
- When using glass or ceramic cookware, check to make sure it is suitable for use on surface burners.
- To avoid tipping, make sure pots and pans are centered on the grates.

PROFESSIONAL BURNER GRATE SYSTEM

Made of heavy-duty, porcelain-coated cast iron, the professional burner grate system is sturdy and stable. The center grate creates a level, continuous surface, which makes moving cookware off burners easier. The center grate can also be used on the counter as a cooling rack. The rubber feet secure its position. The professional-style center and burner grates are dishwasher-safe. For more information, see the "Cleaning Chart" on p. 39.

CHARACTERISTICS OF COOKWARE MATERIALS

The pan material affects how fast heat transfers from the surface cooking area through the pan material and how evenly heat spreads over the pan bottom. Choose pans that provide the best cooking results.

Aluminum	 Heats quickly and evenly. Use for all types of cooking. Medium or heavy thickness is best for most cooking. Used as a core or base in cookware to provide even heating. 	
Cast iron	 Heats slowly and evenly. Good for browning and frying. Maintains heat for slow cooking. Can be coated with porcelain enamel. 	
Ceramic or ceramic glass	 Heats slowly and unevenly. Use on low to medium settings. Follow manufacturer's instructions. 	
Copper	Heats very quickly and evenly.Used as a core or base in cookware to provide even heating.	
Earthenware	 Can be used for cooktop cooking if recommended by the manufacturer. Use on low settings. 	
Porcelain enamel-on-steel or enamel-on-cast iron	See cast iron and stainless steel.	
Stainless steel	 Heats quickly but unevenly. A core or base of aluminum or copper on the cookware provides even heating. Can be coated with porcelain enamel. 	

USING THE OVEN

STURDIGLIDE** oven racks with integrated handle

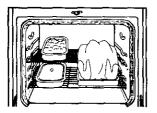

The integrated handle area makes pulling out the STURDIGLIDE™ rack simple. The opening is large enough for a potholder or oven mitt.

STURDIGLIDETH HALF-RACK with removable insert

The STURDIGLIDE™ HALF-RACK with removable insert is a space maximizer. When attached, they make a full rack. The insert can also be used on the counter for a cooling rack.

Position a full rack on guide 1 or 2 and the half-rack on guide 3 or 4. On the full rack place large items on right side and deeper, covered dishes on left side. Place shallow dishes on the half-rack. It may be necessary to increase cooking time. At the end of cooking, carefully remove items from the oven.

Positioning racks and pans

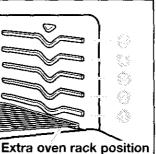

Place the STURDIGLIDE racks where you need them before turning on the oven.

- To move a rack, pull it out to the stop position, raise the front edge and lift it out.
- Be sure the rack(s) is level.
- Use pot holders or oven mitts to protect your hands if rack(s) must be moved while the oven is hot.
- For best performance, cook on one rack. Place the rack so the top of the food will be centered in the oven.
- When cooking with two racks, arrange the racks on the 2nd and 4th rack guides. Two sheets of cookies may be baked if sheets are switched at approximately three quarters of the total bake time. Increase baking time, if necessary.

 For best results allow 2 inches of space around each pan and between pans and oven walls. Hot air must circulate around pans in the oven for even heat to reach all parts of the oven. This results in better baking.

Extra oven rack position (reasting rack)

Use this rack position when roasting food too large to be placed on the first rack position.

For proper roasting, follow these guidelines:

- To avoid spillage, remove food before pulling out the rack.
- Tilt the rack up at the front before pulling it over the door.
- Use an adequate amount of liquid in the pan (meat juices or water) so your food does not get overdone.

Where to place pans:

WHEN YOU HAVE	PLACE
1 pan	In center of the oven rack.
2 pans	Side by side or slightly staggered.
3 or 4 pans	In opposite corners on each oven rack. Stagger pans so no pan is directly over another.

Rack placement for specific foods:

FOOD	RACK POSITION
Frozen pies, large roasts, turkeys, angel food cakes	1st or 2nd rack guide from bottom
Bundt cakes, most quick breads, yeast breads, casseroles, meats	2nd rack guide from bottom
Cookies, biscuits, muffins, cakes, nonfrozen pies	2nd or 3rd rack guide from bottom

NOTE: For information on where to place your rack when broiling, see "Broiling guidelines," pp. 20, 21.

BAKEWARE CHOICES

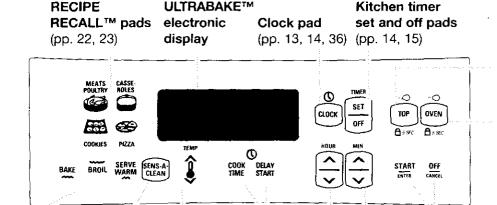

Baking performance is affected by the type of bakeware used. Use the bakeware size recommended in the recipe.

BAKEWARE TYPE	BEST USED FOR	GUIDELINES
Light colored aluminum	Light golden crustsEven browning	Use temperature and time recommended in recipe.
Dark aluminum and other bakeware with dark, dull, and/or non-stick finish	Brown, crisp crusts	 May reduce baking temperature 25°F. Use suggested baking time. Use temperature and time recommended in recipe for pies, breads, and casseroles. Place rack in center of oven.
Ovenproof glassware, ceramic glass, or ceramic	Brown, crisp crusts	May reduce baking temperature 25°F.
Insulated cookie sheets or baking pans	Little or no bottom browning	Place in the bottom third of oven.May need to increase baking time.
Stainless steel	Light, golden crusts Uneven browning	May need to increase baking time.
Stoneware	Crisp crusts	Follow manufacturer's instructions.

USING ALUMINUM FOIL

- Do not line the oven bottom with any type of foil, liners, or cookware. Permanent damage will occur to the oven bottom finish.
- Do not block the oven bottom vents.
- Do not cover the entire rack with aluminum foil.
 Doing so will reduce air circulation and overall oven performance.
- To catch spillovers from pies or casseroles place foil on the oven rack below. Foil should be turned up at edges and be at least 1 inch larger than dish.
- Place tent-shaped foil loosely over meat or poultry to slow down surface browning for long term roasting. Remove foil for the last 30 minutes.
- **Use narrow strips** of foil to shield piecrust edges if browning too quickly.

THE ELECTRONIC OVEN CONTROL

Manual console night light and cooktop lockout pad (pp. 14, 45)

Manual oven light and oven lockout pad (pp. 13, 44)

serve warm, pp. 24, 25, 27)

Display/clock

- After you install the range according to the installation instructions and connect the power supply, everything on the display will light up for about 5 seconds, then a time of day and "PF" will appear on the temperature display. Press OFF/CANCEL to clear "PF" from the display. If, after you set the clock (see "Setting the clock," p. 13), "PF" again appears on the display, your electricity was off for a while indicating a Power Failure. Reset the clock, if needed.
- When you are not using the oven, the display will show the time of day.
- When you are using the oven or kitchen timer. the display will show times, temperature settings, and what command pads have been pressed.
- You can find out what time the oven turned on or is going to turn on when the display is active by pressing DELAY START.

- When showing the time of day, the display will show the hour and minutes.
- When you are using the kitchen timer, the display will show minutes and seconds in the following sequence:
 - For settings from 1 to 59 minutes, the display will count down each second.
 - For settings one hour or over, the display will count down each minute.
- When you are using COOK TIME and DELAY

(V) COOK DELAY TIME START START, the display will show hours and minutes or minutes and seconds.

SETTING THE CLOCK

1. Press CLOCK.

PRESS

YOU SEE

(denotes blinking)

TIME

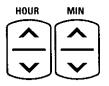

(example for 12:00)

2. Set the time.

Press the HOUR/MIN (▲) or (▼) pad(s) until the correct time of day shows on the display.

PRESS

YOU SEE

(example for 5:30)

3. Press START/ENTER or CLOCK.

NOTE: This is a 12-hour clock. It does not show a.m. or p.m.

PRESS

YOU SEE

USING THE OVEN LOCKOUT

The oven lock lets you prevent use of the control panel command keypads. This feature comes in handy when cleaning the control panel to avoid accidentally turning on the oven.

NOTE: You can only lock the oven when the oven is not in use or the control has not been set. The oven will remain locked after a power failure if it was locked before the power failure.

To lock the oven:

Press and hold the OVEN keypad for 5 seconds.

OVEN

A55€C

You will hear a single tone and "Loc" and will appear on the display. Three tones will sound when the oven is locked and you press any command pad other than CLOCK, TIMER, START/ENTER,

OFF/CANCEL, TOP or OVEN.

To unlock the oven:

Press and hold the OVEN keypad for 5 seconds.

You will hear a single tone and "Loc" and

ightharpoonup will disappear from the temperature display.

USING THE COOKTOP LOCKOUT

The cooktop lock prevents unintended use of the cooktop burners by shutting off the gas flow to the burners.

NOTES:

- Turn off all cooking zones first.
- The cooktop will remain locked after a power failure if it was locked before the power failure.
- If the product loses power, you will be unable to activate the burners until power is restored.

To lock the cooktop:

Press and hold the TOP keypad for 5 seconds. You will hear a single tone and "Loc on" will show in the display for 5 seconds. Then TOP will appear on the display.

To unlock the cooktop:

Press and hold the TOP keypad for 5 seconds.

You will hear a single tone and "Loc OFF" will show in the display for 5 seconds EB will disappear from the display.

TONES

Keypad tones let you know a keypad has been pushed.

To remove keypad tones:

Press and hold the COOK TIME keypad for

COOK TIME

5 seconds. You will hear a short tone and see "Snd OFF" when the keypad tones

are turned off.

To bring back keypad tones:

Press and hold the COOK TIME keypad for

COOK TIME

5 seconds. You will hear a short tone and see "Snd on" when the keypad tones are

turned on.

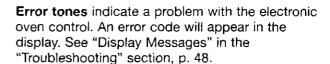

Repeater tones are four 1-second tones which remind you that the set time has expired for a kitchen timer or a timed oven control function.

To remove repeater tones:

Press and hold the SET keypad for 5 seconds. You TIMER will hear a short tone and see "rEP OFF" when the repeater tones are turned off. SET

To bring back repeater tones:

Press and hold the SET keypad for 5 seconds. You TIMER will hear a short tone and see "rEP on" when the repeater tones are turned on. SET

Volume can be adjusted between high and low.

To adjust:

Press and hold the DELAY START keypad for

DELAY START

5 seconds. You will hear a short tone and see either "Snd HI" or "Snd Lo". Press and hold the DELAY START keypad again for 5 seconds to change to desired setting.

NOTE: You can remove "Snd on", "Snd OFF", "rEP on", "rEP OFF", "Snd HI" or "Snd Lo" from the display and bring back the time of day by pressing any key.

USING THE 12-HOUR SHUT-OFF

The oven control is set to automatically shut the oven off 12 hours after the oven turns on. This will not interfere with any timed or delayed cook function.

To override the 12-hour shut-off:

For longer cooking periods and for religious observances that require oven usage longer than 12 hours, press and hold the CLOCK keypad for 5 seconds. You will hear a tone and see "12H OFF" when the feature is off. The oven will remain on until turned off by the user.

NOTE: The oven light will come on when the oven door is opened. To keep the light on continuously, turn the light on by pressing the OVEN keypad. See instructions, p. 44.

To reset the 12-hour shut-off:

Press and hold the CLOCK keypad for 5 seconds. You will hear a tone and see "12H on" when the feature is on. The oven will automatically turn off after 12 hours.

USING THE ELECTRONIC KITCHEN TIMER

The kitchen timer allows you to monitor time for cooking and other tasks. It does not start or stop the oven. See the "Using the Timed Oven Control" section (p.28) to start and stop the oven automatically. It can be set in hours and minutes up to 12 hours, 59 minutes. The kitchen timer will display minutes and seconds for settings under 1 hour. You will hear four 1-second tones when the set time is up.

To set the kitchen limer:

1. Press TIMER SET.

YOU SEE

2. Set the time.

Press the HOUR/MIN (▲) or (▼) pad(s) until the correct length of time shows on the display.

YOU SEE

3. Press START/ENTER or TIMER SET.

The kitchen timer will begin counting down immediately after the timer is started. The display will count down in hours and minutes (if remaining time is one hour or more) and in minutes and seconds (if remaining time is less than one hour).

When the time is up:

You will hear four 1-second tones, then four 1-second repeater tones every minute until you press TIMER OFF.

PRESS

YOU SEE

(display counts down)

YOU SEE

To turn off or cancel the kitchen timer:

1. Press TIMER OFF.

PRESS

YOU SEE

(time of day)

STARTING/CANCELING A FUNCTION

After setting a function, you must press START/

START ENTER to start the function. If you do not press START/ENTER within 5 seconds of setting, "START?" will show on the display as a reminder. If you do not press START/ENTER within 5 minutes of setting, the time of day will appear. You must reset the function and press START/ENTER.

OFF/CANCEL will cancel any function except the

Clock, Timer, or Oven/Cooktop Lockouts.

When you press OFF/CANCEL, the display will show the time of day or, if the minute timer is also being used, the time remaining.

ULTRABAKE™ BAKING/ROASTING

Your oven is designed with the ULTRABAKE™ enhanced baking system to constantly monitor oven temperature. The bake burner will cycle, as needed, to maintain the desired temperature. This feature is automatically activated when the oven is in operation.

IMPORTANT:

- When using the oven for the first time, it is necessary to light the surface burners first to purge air from the gas line.
- Do not try to light the oven burner during a power failure.
- Never place food or cookware directly on the oven door or the oven bottom.
- **1.** Place the STURDIGLIDE™ rack(s) where you need them in the oven. For more information, see the "Positioning racks and pans" section, p. 10.
- 2. Press BAKE.

PRESS

BAKE

YOU SEE

3. Set the temperature (optional).

Do this step if you want to set a temperature other than 350°F. Press TEMP (▲) or (▼) pad(s) to raise or lower the temperature in 5°F amounts. Use these pads until the desired temperature shows on the small display.

PRESS

TEMP

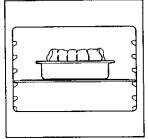

YOU SEE

(example for bake at 375°F)

ULTRABAKE™ BAKING/ROASTING (contd.)

essary unless your recipe recommends it.

NOTE: The oven will heat normally even though "PrE HEAt" is displayed and then maintain the selected cooking temperature.

Roastino meais and dosity

- For even cooking, place the meat on a rack in a shallow pan. This keeps the meat out of the drippings and allows the heat to circulate better.
- Use a meat thermometer for the most accurate doneness. Insert it so the tip is in the center of the largest muscle or thickest portion of the meat or poultry. Make sure the thermometer is not touching bone, fat, or the bottom of the pan.

5. Press START/ENTER.

A preheat mode is entered after the oven temperature has been set and START has been pressed. Once the preheat conditioning ends, the selected oven temperature replaces "PrE HEAt" on the display. You will hear a 1-second tone, indicating the oven is ready to use.

The ULTRABAKE™ system electronically regulates the preheat and temperature to maintain a precise temperature range for the best cooking results.

PRESS

START

YOU SEE

YOU SEE

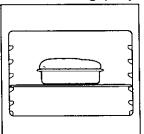

(example for set temperature of 350°F)

NOTES:

- You can change the temperature setting any time after pressing START/ENTER. You do not have to press START/ENTER again.
- While the oven is in the preheat mode, you can see the set temperature for 5 seconds by pressing BAKE.

6. When baking, put your food in the oven after

the preheat conditioning ends. During baking/ roasting, the oven burner will turn on and off to keep the oven temperature at the setting.

Saving energy

- To avoid loss of heat, open the oven door as little as possible.
- Use the timer to keep track of cooking time.
- Plan your meals for the most efficient use of the oven by cooking more than one food at a time, or baking while the oven is still hot after cooking a meal.

7. After cooking, turn off the oven.

PRESS

OFF

YOU SEE

(time of day)

READJUSTING THE OVEN TEMPERATURE CONTROL (OPTIONAL)

Although your new oven is properly adjusted to provide accurate temperatures, it may cook faster or slower than your old oven.

If you are not satisfied with the baking/roasting results, you can change the temperature calibration by following the steps below.

1. Press and hold BAKE for 5 seconds.

The display will show the current temperature calibration, for example "0," if you have not already adjusted the temperature.

NOTE: DO NOT measure the oven temperature with a thermometer. Opening the oven door will lower the oven temperature and give you an incorrect reading. Also, the thermometer temperature reading will change as your oven cycles.

PRESS

BAKE

YOU SEE

(factory setting of "0")

2. Set the new offset temperature.

Press TEMP (▲) or (▼) pad(s) to raise or lower the temperature in 10°F amounts. You can set the temperature change to as low as -30°F or as high as +30°F. A minus (-) sign will appear before the number when decreasing the temperature setting. The minus sign shows the oven will be cooler by the displayed amount. There is no sign in front of the number when increasing the temperature setting.

PRESS

TEMP

YOU SEE

(example when making oven 10°F warmer)

3. Enter the adjustment.

NOTE: You must press START/ENTER after adjusting the calibration or your changes will not be made.

PRESS

START

YOU SEE

(time of day)

How to determine the amount of adjustment needed

The chart at the right tells you how much to adjust the temperature calibration to get the cooking results you want. You can figure out cooking results by the amount of browning, moistness, and rising times for baked foods.

TO COOK FOOD	ADJUST BY THIS NUMBER OF DEGREES (FAHRENHEIT)
A little more	+10
Moderately more	+20
Much more	+30
A little less	-10
Moderately less	-20
Much less	-30

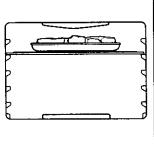

To display temperatures in "C instead of "F:

Press and hold BROIL for 5 seconds. You will hear a short tone and the temperatures displayed will switch to °C. To switch back to °F, repeat the instructions above. Whenever you switch, "°C" or "°F" will be displayed until another key is pressed.

BROILING

For best results, do not preheat when broiling unless your recipe recommends it.

- Place the STURDIGLIDE™ rack so that the surface of the food is no less than 3 inches away from the broil burner. See "Broiling guidelines," pp. 20, 21.
- 2. Put your food on the broiler pan and place the

pan in the center of the oven rack. Close the door.

3. Press BROIL.

PRESS

BROILING (contd.)

Precision broiling

Use precision broiling if your food is cooking too fast or if you want your food to broil slower from the start. The lower the temperature, the slower the cooking. Thicker cuts and unevenly shaped pieces of meat, fish and poultry may cook better if you use lower broiling temperatures.

1. Press BROIL.

PRESS

BROIL

Broiling guidelines

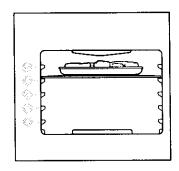

- Use only the broiler pan and grid provided. They are designed to drain extra juices from the cooking surface. This drainage helps prevent spatter and smoke.
- To make sure the juices drain well, do not cover the grid with foil.
- Trim excess fat to reduce spattering. Slit the fat on the edges to prevent curling.
- Use tongs to turn meat to avoid losing juices.

- Pull out oven rack to stop position before turning or removing food.
- After broiling, remove the pan from the oven when removing the food. Drippings will bake on the pan if left in the heated oven, making cleaning more difficult.
- For easier cleaning, line the bottom of the pan with aluminum foil. Clean the pan and grid as soon as possible after each use.

BROILING (contd.)

Broiling guidelines (centa)

Recommended rack positions are numbered from the bottom (1) to the top (5). For best results, place food 3 inches or more from the broil burner. Times are guidelines only and may need to be adjusted for individual tastes.

USING RECIPE RECALL™

RECIPE RECALL makes cooking your favorite foods faster and easier. The temperatures and times have been chosen to cover a variety of choices in each food category. Cooking times are adjustable for individual recipes and can be saved. Temperatures can be changed but not saved. When changed, the display will not show "PreHEAt" while the oven is preheating.

Keypad	Set Temperature	Preset Time
MEATS POULTRY	325°F	. 1 hr
CASSE- ROLES	350°F	45 min.
CODKIES	375°F	10 min.
PIZZA	400°F	20 min.

- Place the STURDIGLIDE™ rack(s) where you need them. To place your racks correctly, see "Positioning racks and pans" section, p. 10.
 If recipe recommends no preheat is needed, put your food in the oven now. While CASSEROLES does not enter "PrEHEAt", it is recommended to allow the oven to preheat for 10 minutes before putting food in the oven.
- **2.** Press one of the four keypads MEATS POULTRY, CASSEROLES, COOKIES or PIZZA.

USING THE TIMED OVEN CONTROL

AWARNING

Food Poisoning Hazard

Do not let food sit in oven more than one hour before or after cooking.

Doing so can result in food poisoning or sickness.

The Timed Oven control will turn the oven on at a set time of day, cook for a set length of time, then shut off automatically when programmed. You can do this by setting the Cook Time and Delay Start.

Before using the Timed Oven control, make sure the clock is set to the correct time of day. (See "Setting the clock," p. 13.)

To Start now and Stop automatically:

Set COOK TIME

To Delay Start and Stop automatically:

Set COOK TIME and DELAY START

NOTE: Delayed time cooking is ideal for foods that do not need a preheated oven, like meats and casseroles. Do not use a delayed time function when baking.

To start now and stop automatically:

To use this function, it is necessary to program the COOK TIME.

- Place the STURDIGLIDE™ rack(s) where you need them and put your food in the oven. To place your racks correctly, see "Positioning racks and pans" section, p. 10.
- 2. Press BAKE.

PRESS

BAKE

USING THE WARM & READY WARMING DRAWER

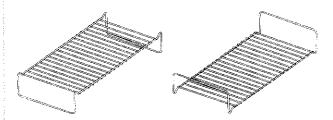

AWARNING

Food Poisoning Hazard

Do not let food sit for more than one hour before or after cooking.

Doing so can result in food poisoning or sickness.

The Warm & Ready warming drawer is ideal for keeping hot cooked foods at serving temperature. It may also be used for warming breads and pastries. This feature, activated by the WARM & READY knob on the control panel, controls warming in the warming drawer, which is located below the oven. The rack can be used in two positions.

- For best results, hold most foods no longer than one hour. Hold smaller quantities and heat sensitive foods, such as eggs, no longer than 30 minutes.
- Food must be at serving temperature before being placed in the drawer.
- Different types of food can be placed in the warming drawer at the same time.
- Breads, pastries, and fruit pies may be warmed from room temperature on HI setting.
- Remove food from plastic bags and place in an oven-safe container.
- Cover foods with a lid or aluminum foil, not plastic wrap.
- Use only containers approved for oven use and follow manufacturer's instructions.
- Empty serving dishes and dinner plates can be heated while preheating the drawer.

76 dsa:

- **1.** If using rack, position it where needed.
- **2.** Turn the WARM & READY switch to choose HI, MED or LO settings.
- **3.** Allow the drawer to preheat for ten minutes.

- 4. Place container with food in warming drawer.
- **5.** When finished, turn knob to OFF.

USING THE WARM & READY WARMING DRAWER (contd.)

Remove all items from inside the warming drawer and allow the unit to cool completely before attempting to remove the drawer.

- 1. Pull drawer to its full open position.
- **2.** Locate the black triangle tabs on each side of the drawer.
- **4.** Carefully pull the drawer all the way out holding on to the sides, not the drawer front.
- **1.** Align the drawer glides with the receiving guides.

- Tab
- **3.** Press the tab DOWN on the RIGHT side and lift the tab UP on the LEFT side at the same time. Then pull drawer out another inch.

- 2. Push drawer in completely.
- **3.** Gently open and close drawer to ensure it is seated properly on the slides.

THE OVEN VENT

Hot air and moisture escape from the oven through a vent that is near the middle of the backguard. The vent lets air circulate properly. Be careful not to block the vent, or you will get poor baking/roasting results.

NOTE: Never store plastics, paper, or other items that could melt or burn near the oven vent, or any of the surface burners.

Using the SENS-A-CLEAN™ Self-Cleaning Cycle

AWARNING

Burn Hazard

Do not touch the oven during the Self-Cleaning cycle.

Keep children away from oven during Self-Cleaning cycle.

Do not use commercial oven cleaners in your oven.

Failure to follow these instructions can result in burns, or illness from inhaling dangerous fumes.

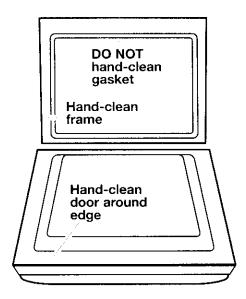

BEFORE YOU START

NOTES:

- Heat and odors are normal during the Self-Cleaning cycle. Keep the kitchen well ventilated by opening a window or by turning on a vent hood or other kitchen vent during the cycle.
- DO NOT clean, move, or bend the gasket. You may get poor cleaning, baking, and roasting.
- The oven light will not work during the Self-Cleaning cycle.
- The console night light will not work during the Self-Cleaning cycle.

Before you start the Self-Cleaning cycle, make sure you:

- Hand-clean the areas shown. They do not get hot enough during the Self-Cleaning cycle for soil to burn away. Use hot water and detergent or a soapy, steel-wool pad for cleaning.
- Do not let water, cleaner, etc., enter slots on door and frame.
- Remove the broiler pan and grid and any cookware/bakeware being stored in the oven.
- Wipe out any loose soil or grease. This will help reduce smoke during the Self-Cleaning cycle.
- Wipe up food spills containing sugar and/or milk as soon as possible after the oven cools down.
 When sugar is heated to a high temperature in the Self-Cleaning cycle, the high temperature can cause the sugar to burn and react with the porcelain. This can cause staining and etching or pitting.
- Remove the oven racks from the oven if you want them to remain shiny. You can clean the oven racks in the Self-Cleaning cycle, but they will become harder to slide. (See the "Cleaning chart" in the "Caring for Your Range" section, p. 40.) If you clean the racks in the Self-Cleaning cycle, place them on the 2nd and 4th rack guides. (The guides are counted from bottom to top.)

IMPORTANT: The health of some birds is extremely sensitive to the fumes given off during the Self-Cleaning cycle. Exposure to the fumes may result in death to certain birds. Always move birds to another closed and well ventilated room.

TIPS:

- Keep the kitchen well ventilated during the Self-Cleaning cycle to help get rid of heat, odors, and smoke.
- Clean the oven before it gets heavily soiled.
 Cleaning a very soiled oven takes longer and results in more smoke than usual.
- Do not block the vent during the Self-Cleaning cycle. Air must move freely for best cleaning results.
- Do not leave plastic utensils on the cooktop. They may melt.
- Do not leave any foil in the oven during the Self-Cleaning cycle. Foil could burn or melt and damage the oven surface.

HOW THE CYCLE WORKS

The SENS-A-CLEAN™ Self-Cleaning cycle uses temperatures much hotter than normal oven use to break up and burn away soil and grease. The oven is equipped with a sensor that evaluates by-products released from burning off baked-on food and cleans accordingly. There is no guessing on how long to set the time because all steps are taken care of by the "one-touch" button. The oven will automatically shut off once it senses it is clean. As another option, the soil level can be manually set to light, average or heavy soil levels.

The door must be closed completely for it to lock and the cycle to begin. If properly closed, the door will lock approximately 6 seconds after START/ENTER is pressed. The cycle time includes an approximate 30 minute cool down time. To see the time of day during the cycle, press CLOCK for 5 seconds.

NOTE: The first Self-Cleaning cycle will be approximately 4 hours in duration. This is to allow the high temperature calibration of the sensor and to burn off manufacturing residues.

SETTING THE CONTROLS

To start SSMS-A-CLEAR Self-Cleaning immediately:

1. Press SENS-A-CLEAN.

SEnS setting will automatically determine the length of cleaning time. Maximum clean time is 4½ hours and minimum is 2 hours.

PRESS

YOU SEE

 (Optional) If you would prefer to set the soil level yourself, you can set Light, Average or Heavy soil. You can scroll through all 4 settings (SEnS, SoilL, SoilA, and SoilH) continuously by pressing the SENS-A-CLEAN keypad.

Press SENS-A-CLEAN twice, SoilL (for light soils) will appear on the display.

Press SENS-A-CLEAN three times, SoilA (for average soils) will appear on the display.

Press SENS-A-CLEAN four times, SoilH (for heavy soils) will appear on the display.

SoilL will clean for approximately 2-2½ hours, SoilA for 3-3½ hours, and SoilH for 4-4½ hours.

PRESS

YOU SEE

(example shows light soil setting)

3. Press START/ENTER.

PRESS

START ENTER YOU SEE

4. After the SENS-A-CLEAN Self-Cleaning cycle ends: LOCKED goes off and the door unlocks.

YOU SEE

5. Press any pad to remove "End" and bring back time of day; or open door, at which time "door" will be displayed. Then close door and time of day will appear in display window.

6. After the oven is cool, wipe off any residue or ash with a damp cloth or sponge. If needed, touch up spots with a mild abrasive cleanser or cleaning sponge.

To delay start the SENS-A-CLEAN® Self-Cléaning cycle:

1. Press SENS-A-CLEAN.

SEnS setting will automatically determine the length of cleaning time. Maximum clean time is 4½ hours and minimum is 2 hours.

2. (Optional) If you would prefer to set the soil level yourself, you can set Light, Average or Heavy soil. You can scroll through all 4 settings (SEnS, SoilL, SoilA, and SoilH) continuously by pressing the SENS-A-CLEAN keypad.

Press SENS-A-CLEAN twice, SoilL (for light soils) will appear on the display.

Press SENS-A-CLEAN three times, SoilA (for average soils) will appear on the display.

Press SENS-A-CLEAN four times, SoilH (for heavy soils) will appear on the display.

SoilL will clean for approximately 2-21/2 hours, SoilA for 3-31/2 hours, and SoilH for 4-41/2 hours.

3. Press DELAY START.

4. Set the start time.

Press the HOUR/MIN (▲) or (▼) pad(s) until the desired time of day to start the SENS-A-CLEAN Self-Cleaning cycle shows on the display.

Caring for Your Range

AWARNING

Explosion Hazard

Do not store flammable materials such as gasoline near this appliance. Doing so can result in death, explosion, or fire.

CLEANING CHART

Before cleaning, always make sure all controls are off and the range is cool. Refer to instructions on all cleaning products before using them to clean your range.

PART	CLEANING METHOD	SPECIAL INSTRUCTIONS
Control knobs	Soap and water Dishwasher	 DO NOT use steel wool or abrasive cleaners. Pull knobs straight away from control panel. Wash, rinse and dry with soft cloth.
Control panel and console	Soap and water	Wash, rinse and dry with soft cloth.
night light lens	Spray glass cleaner	Apply spray cleaner to paper towel; do not spray directly on panel.
Exterior surfaces* (excluding control panel and oven door glass)	Soap and waterMild liquid cleanerSpray glass cleaner	 DO NOT use abrasive or harsh cleaners like chlorine bleach, ammonia or oven cleaners. Wash, rinse and dry with soft cloth.
	Non-abrasive plastic scrubbing pad	Gently clean around the model and serial plate, too much scrubbing could remove the numbers.
		NOTE: To avoid product damage, do not remove the cooktop.
Porcelain-coated cooktop grates and surface burner caps*	Sears Grate Cleaner	
Light to moderate soil	 Soap and water Non-abrasive plastic scrubbing pad 	Clean as soon as they become dirty.Wash, rinse and dry well.
	Dishwasher (grates only)	Run dishwasher with only grates loaded on the lower rack using the most aggressive cycle.
• Heavy burned-on soils	 Non-abrasive plastic scrubbing pad Mild abrasive powdered cleanser and water 	 Repeat steps of cleaning process (with items at left) as needed, until soil is completely removed. Rinse thoroughly and dry.
		 NOTE: Do not reassemble caps on burners while wet. Do not wash caps in dishwasher.

^{*}When the cooktop is cool, remove all spills and clean. Food spills containing acids, such as vinegar and tomato, may affect the finish. To avoid porcelain grate chipping, do not bang grates and caps against each other or other hard surfaces such as cast iron cookware.

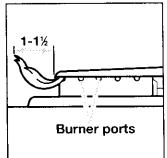

CLEANING CHART (contd.)

PART	CLEANING METHOD	SPECIAL INSTRUCTIONS
Surface burners		See "Sealed surface burners and cooktop" in the "Caring for Your Range" section, p. 41.
Oven door glass	Soap and waterNon-abrasive plastic scrubbing pad	Wash, rinse and dry with soft cloth.
	Spray glass cleaner	Wipe with paper towel.
Oven cavity Food spills containing sugar and/or milk All other spills	Soap and water Self-cleaning cycle	When oven cools, wash, rinse and dry with soft cloth. See "Using the SENS-A-CLEAN™
• An other spills	- Seir-cleaning cycle	Self-Cleaning Cycle," p. 35.
Oven racks	Soap and water Steel wool pad	Wash, rinse and dry.
	Self-cleaning cycle	Place on 2nd and 4th rack guides. Racks will discolor and become harder to slide. After cleaning, apply vegetable oil to rack guides for easier sliding.
Broiler pan and grid	Soap and water Steel wool pad Dishwasher	Wash, rinse and dry.
	Solution of 1/2 cup ammonia to 1 gallon water Mild abrasive cleanser or commercial oven cleaner	 Soak for 20 minutes, then scrub with plastic scrubbing pad. DO NOT clean the pan and grid in the self-cleaning cycle.
Warming drawer cavity ● Food spills containing sugar and/or milk	Soap and water	When drawer cools, wash, rinse and dry with soft cloth.
All other spills	Mild detergent	Wash, rinse and dry with soft cloth.

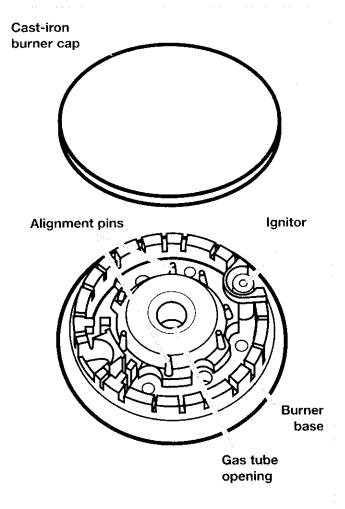

SEALED SURFACE BURNERS AND COOKTOP

Cleaning the surface burners

- You should routinely remove and clean the burner cap. Always clean the burner cap after a spill-over.
 Keeping the burner cap clean prevents poor ignition and an uneven flame.
- For the proper flow of gas and ignition of the burner, do not allow spills, food, cleaning agents, or any other material to enter the gas tube opening or burner ports.
- Gas must flow freely through the gas tube opening for the burner to light properly. Keep this area free of any soil and protect it from boilovers or spillovers. Always keep the burner cap in place whenever a surface burner is in use.
- Let the cooktop cool before cleaning.
- Do not use oven cleaners, bleach, or rust removers.
- Do not obstruct the flow of combustion and ventilation air around the burner grate edges.
- Occasionally check the burner flames for proper

size and shape as shown. A good flame is blue in color not yellow. If the flames are not burning at all ports, you may need to clean the burner ports.

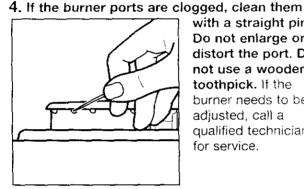

continued on next page

SEALED SURFACE BURNERS AND COOKTOP (contd.)

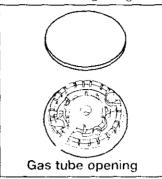

To pleas the bustons:

- 1. Remove the burner cap from the burner base.
- 2. Clean the burner cap with warm, soapy water and a sponge. You can also clean it with a mildly abrasive scrubbing pad or cleanser. Do not clean the burner cap in a dishwasher or self-cleaning oven.
- 3. If the gas tube opening has become soiled or clogged, use a damp cloth to clean the area.

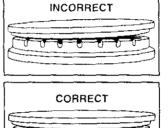

with a straight pin. Do not enlarge or distort the port. Do not use a wooden toothpick. If the burner needs to be adjusted, call a qualified technician for service.

5. After cleaning the gas tube opening and ports.

replace the burner cap. To replace the burner cap, make sure the alignment pins on the cap are properly aligned with the burner base.

6. Turn on the burner to see if it will light. If the

burner does not light after you have cleaned it, recheck cap alignment or contact a Sears Service Center. Do not service the sealed burner yourself.

REMOVING THE OVEN DOOR

For normal use of your range, you do not need to remove the door. However, if you find it necessary to remove the door, follow the instructions in this section.

NOTE: The oven door is heavy.

Before removing the door:

- 1. Use a putty knife or screwdriver and insert it at the bottom corner of the door stop clip.
- 2. Pry door stop clip free and remove from front frame hinge slot. Take care not to scratch porcelain.
- 3. Repeat procedure for other door stop clip.

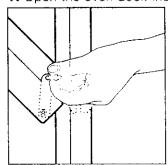

Door stop clip Door removal pin hole Range

Hinge hanger

Front frame hinge slot

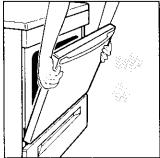

REMOVING THE OVEN DOOR (contd.)

1. Open the oven door. Insert door removal pins,

included with your range, into both hinge hangers. Do not remove the pins while the door is removed from the range.

3. Grasp the door on the sides with your fingers

on the front of the door and your thumbs on the inside surface.

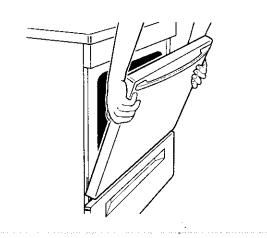

2. Carefully close the door until it rests against the door removal pins.

4. Pull door straight up, then toward you. Hinge hangers will slide out of front frame hinge slot.

la essibat

NOTE: The door removal pins you inserted must still be in both door hinges.

1. Grasp the door on the sides with your fingers on the front of the door and your thumbs on the inside surface.

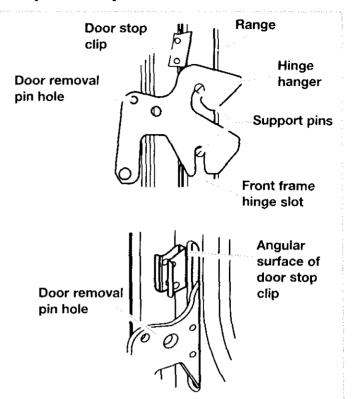

continued on next page

REMOVING THE OVEN DOOR (contd.)

- **2.** Hold oven door so that the top edge of each hinge hanger is horizontal. Insert hinge hangers into the front frame hinge slots.
- **3.** Tilt top of door toward range. Slide hinge hangers down onto front frame support pins.

NOTE: Make sure the hinge hangers are fully seated and engaged on the support pins.

- **4.** Insert the door stop clip with the angular surface at the top of the frame hinge slot, then push in the bottom of the clip until flanges are flush with the front frame.
- **5.** Open the door completely and remove the door removal pins. Save door removal pins for future use
- 6. Close the door.
- **7.** Check for alignment to make sure door is installed evenly.

THE OVEN LIGHT

The oven light will come on when you open the oven door. The oven light will not work during the Self-Cleaning cycle.

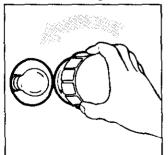

To turn the light on or off when the oven agor is closed:

• Press the OVEN pad.

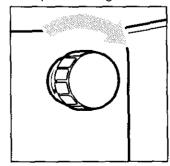

To replace the even light:

- 1. Unplug range or disconnect power.
- 2. Remove the glass bulb cover in the back of the

oven by turning it counterclockwise.

4. Replace the light bulb cover by turning it clockwise.

5. Plug in range or reconnect power.

Remove the light bulb from its socket by turning it counterclockwise. Replace the bulb with a 40-watt appliance bulb.

THE CONSOLE NIGHT LIGHT

The console night light is located on the top of the control panel. It has two replaceable parts. The fluorescent light is a standard F8T5 miniature fluorescent lamp. The starter is the knob-shaped part to the left of the light. It is a standard FS-5C starter. The console night light will not work during the Self-Cleaning cycle.

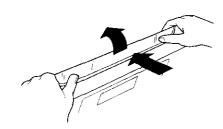

To turn the light on and off:

• Press the TOP pad momentarily.

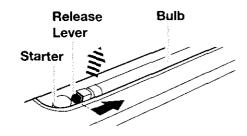

To remove the starter and/or build:

- 1. Unplug range or disconnect power.
- 2. From the front of the range, push back on lens and lift lens out

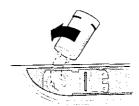

3. Push release lever toward the bulb. The left end of the light assembly will raise up.

- **4.** To remove the starter, turn it counterclockwise and lift out of its mounting base.
- **5.** To remove the bulb, roll it forward or backward 90° until you hear a click, then lift out.

To install the starter and/or bulb:

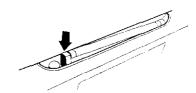

1. Fit starter prongs into starter mounting base and turn clockwise.

2. Slide bulb prongs into bulb mounting base ends. Roll the bulb forward or backward 90° until you hear a click.

3. Push down on the left bulb mounting base. You will hear a click indicating the assembly has latched.

- 4. Replace the lens cover. Position the two rear lens cover tabs in front of the two metal spring clips, located directly behind the bulb. Push back and down on the lens to lock lens into position.
- 5. Plug in range or reconnect power.

Troubleshooting

Most cooking problems are caused by little things you can find and fix without tools of any kind. Check the lists below and on the next page before calling for assistance or service.

RANGE DOES NOT WORK

PROBLEM	CAUSE/SOLUTION
Nothing works	The range is not plugged into a properly grounded outlet (120v polarized).
	 The range is not properly connected to the gas supply. Contact a Sears Service Center to reconnect the range to the gas supply. (See the Installation Instructions.)
	 A household fuse has blown or a circuit breaker has been tripped.
	 The Oven and Cooktop Lockouts have been set.

OVEN/BROILER BURNER

PROBLEM	CAUSE/SOLUTION
The oven does not work	 When using the oven for the first time, it is necessary to light the surface burners first to purge air from the gas lines.
	 The electronic control is not set correctly. Refer to setting the electronic oven control section. (See pp. 12-32.)
	 A delay start has been set. Wait for the start time to be reached or cancel and reset the control.
	 The main or regulator gas shutoff valve is in the off position. (See the Installation Instructions.)
	 The Oven Lockout has been set.
Burner makes muffled ticking noise when in use	 This is normal. This sound occurs when the oven burner cycles on and off to hold the set oven temperature.
The burner fails to light	 The ignition system is broken. Contact a Sears Service Center to replace it. A household fuse has blown or a circuit breaker has been tripped.
The burner flames lift away from the ports, are yellow, or are noisy	 The air/gas mixture is incorrect. Contact a Sears Service Center to check the air/gas mixture or see the Installation Instructions.

SURFACE BURNERS

2 1	PROBLEM	CAUSE/SOLUTION
	The burner fails to light	 The control knob is not set correctly. Push in the control knobs before turning them. Make sure the control knob is turned to the LITE position. (See p. 7.) A household fuse has blown or a circuit breaker has been tripped. The burner ports may be clogged. Clean them with a straight pin. (See p. 42.) Make sure Cooktop Lockout has been cancelled. (See p. 14.) There is a power outage.
	The burner flames are uneven	 The burner ports may be clogged. Clean them with a straight pin. (See p. 42.) The burner caps may not be positioned properly. (See p. 42.)
	The burner flames lift off the ports, are yellow, or are noisy when turned off	 The burner needs cleaning. (See pp. 41, 42.) The burner may be damaged. Contact a Sears Service Center to check the burner. If propane gas is being used, the range may have been converted improperly. Contact a Sears Service Center.
	The burner makes a popping noise when on	The burner is wet from washing. Let it dry.

WHEN SELF-CLEANING YOUR OVEN

1	PROBLEM	CAUSE/SOLUTION
:	The Self-Cleaning cycle	START/ENTER has not been pressed.
	will not work	 A delay start has been set. Wait for the start time to be reached or cancel and reset the control.
1		The door is not closed all the way.

continued on next page

COOKING RESULTS

PROBLEM	CAUSE/SOLUTION
Cookware not level on cooktop (Check to see if liquids are level in cookware)	 Level the range. (See the Installation Instructions.) Use cookware with a flat bottom.
Excessive heat on cooktop in areas around cookware	Choose cookware the same size or slightly larger than the burner flame.
The oven temperature seems too low or too high	 Adjust the oven temperature control. (See "Readjusting the oven temperature control," p. 18.)
Slow baking or roasting	 Increase baking or roasting time. Increase temperature 25°F. Preheat to selected temperature before placing food in oven when preheating is recommended. Choose bakeware that will allow 2 inches of air space around all sides. Open oven door to check food when timer signals shortest time suggested in recipe. Oven peeking can make cooking times longer.
Baked items too brown on bottom	 Preheat oven to selected temperature before placing food in oven. Choose bakeware that will allow 2 inches of air space around all sides. Position rack higher in oven. Decrease oven temperature 15° to 25°F.
Unevenly baked items	 Level the range. Bake in center of oven with 2 inches of space around each pan. Check to make sure batter is level in pan.
Crust edge browns before pie is done	Shield edge with foil.

DISPLAY MESSAGES

PROBLEM	CAUSE/SOLUTION
The display is showing "PF"	 There has been a power failure. Press OFF/CANCEL to clear the display, then reset the clock. (See p. 13.)
"F" followed by a number shows on the display	 Press OFF/CANCEL to clear the display. If an "F" code appears again, call for service.
"EO F5" appears on	Press OFF/CANCEL to clear display.
the display (The oven door will not close because the self-clean latch mechanism interferes.)	 Depress and hold the door switch plunger (located on the oven front frame). Latch mechanism will unlock in about 6 seconds.
